

ALIREZA GOSHAYESH

SENIOR MOBILE ENGINEER (ANDROID/KMP)

 goshayesh.alireza@gmail.com |  alireza-goshayesh |  DeveloperIs.me |  alirezagoshayesh |  +98 922 4968533

Senior Mobile Engineer specializing in Android and Kotlin Multiplatform with **10+ years** of experience building scalable fintech, and consumer applications. Specialized in **Kotlin, Jetpack Compose, Kotlin Multiplatform, Clean Architecture, and modular mobile systems**. Experienced in leading modernization initiatives, cross-platform mobile architectures, SDK development, code reviews, and mentoring. Contributed to mobile products serving millions of users, including mobile banking platforms with over 20M users.

Technical Skills

- Languages: Kotlin, Java
- Android: Android SDK, Jetpack Compose, Coroutines, Flow, Navigation, WorkManager, Room, DataStore, Retrofit, Firebase
- Architecture: Clean Architecture, MVVM, MVI, Modularization & Multi-Module Architecture
- Cross Platform: Kotlin Multiplatform (KMP), Compose Multiplatform, Shared Modules
- Security: AES, RSA, OAuth2, Digital Signatures, Encryption
- Testing: JUnit, MockK, Unit Testing, UI Testing
- Tools: Git, Gradle, Hilt, CI/CD

Experience

- Senior Kotlin Multiplatform Engineer

March 2026 – Present

Bank Mellat

Tehran, Iran

- Designed and implemented a multi-module KMP architecture using Clean and MVI patterns for the Dima banking platform.
 - Developed shared logic and UI across multi platforms, reducing duplicated implementation through KMP shared modules.
 - Built reusable KMP modules and scalable feature architecture to support 30+ banking workflows.
 - Established KMP development standards and architectural guidelines across 8+ engineers.
- Senior Software Engineer (Kotlin Multiplatform)

March 2023 – March 2026 (3 years)

MIDDLE EAST BANK - Large-scale mobile banking platform

Tehran, Iran

- Developed and maintained features for a large-scale mobile banking platform serving 10M+ users.
 - Modernized the app by migrating 100+ screens to Jetpack Compose and introducing Clean Architecture and modular KMP patterns.
 - Led KMP, Mobile, and Backend architecture and code reviews for a 10+ member team.
 - Implemented unit testing using MockK and contributed to maintaining approximately 50–60% business-layer test coverage.
- Android Developer

January 2019 – February 2023 (4 years, 1 month)

VADA - Mobile App & SDK Experts

Tehran, Iran

- Developed and maintained payment and user-management SDKs used across 50+ internal mobile applications.
 - Led technical discussions, code reviews, development processes, and Mentored interns and junior engineers.
 - Delivered and maintained 5 Android applications with download counts ranging from 50K to 1M+ users.

Notable Projects:

- Picture Dictionary (AI-powered dictionary application):
 com.appinaweek.cameradictgp

- Farmoon (Vehicle and Toll services platform)
: com.vada.newfarmoon

Android Developer

April 2018 – November 2018 (7 months)

Farazman - Small startup working on innovative ideas

Tehran, Iran

- Developed Android applications for 3 client projects across multiple business domains.

Freelance Android Developer

May 2016 – March 2018 (1 year, 10 months)

Various Clients

- Delivered multiple Android applications across e-commerce, social media, and fitness domains
- Languages
- English: Professional Working Proficiency (B2-C1)

Persian: Native
- Education
- Sadra University

Tehran, Iran

B.Sc. in Computer Engineering

September 2016 – June 2020
