## SENIOR ANDROID ENGINEER

✉ goshayesh.alireza@gmail.com | 💻 alireza-goshayesh | 🌐 DeveloperIs.me | 🔗 alirezagoshayesh | 📞 +98 922 4968533

Senior Android Engineer with **10+ years of experience** building large-scale mobile applications across fintech, banking, and consumer products. Specialized in **Kotlin, Jetpack Compose, Kotlin Multiplatform (KMP), Clean Architecture, and modular Android systems**. Experienced in leading modernization initiatives, cross-platform mobile architectures, SDK development, code reviews, and mentoring engineers. Contributed to mobile products serving millions of users, including a mobile banking platform with over 10M users.

### Technical Skills

**Languages:** Kotlin, Java

**Android:** Jetpack Compose, Coroutines, Flow, Navigation, WorkManager, Room, DataStore, Retrofit, Firebase

**Architecture:** Clean Architecture, MVVM, MVI, Modularization

**Cross Platform:** Kotlin Multiplatform (KMP)

**Encryption & Signature:** Symmetric (AES, ...), Asymmetric(RSA, ...), DSA, OAuth2

**Testing:** JUnit, MockK, Unit Testing, Compose UI Testing

**Tools:** Git, Gradle, Hilt, CI/CD

### Experience

#### Senior Android Engineer

March 2023 – Present

MIDDLE EAST BANK - Second Largest Bank in Iran

Tehran, Iran

- Led the modernization of a large-scale mobile banking application serving 10M+ users.
- Led the migration of more than 100 application screens from legacy Android Views to Jetpack Compose.
- Contributed to migrating to KMP, enabling shared business logic across Android and iOS platforms.
- Participated in architectural design, code reviews, and engineering standards across the mobile team.
- Implemented unit testing using MockK and contributed to maintaining approximately 50–60% business-layer test coverage.

#### Android Engineer

June 2021 – May 2023 (1 year, 11 months)

VADA - Mobile App Experts

Tehran, Iran

- Led technical discussions, code reviews, and development processes across multiple Android projects.
- Mentored interns and junior engineers, supporting onboarding and technical growth.
- Reduced application crashes and improved stability through SDK optimization and proactive issue resolution.

#### Android Developer

January 2019 – June 2021 (2 years, 6 months)

VADA - Product Development Division

Tehran, Iran

- Delivered and maintained 5 Android applications with download counts ranging from 50K to 1M+ users.

#### ➤ Notable Projects:

- **Picture Dictionary:**  com.appinaweek.cameradictgp
- **Farmoon (Toll Services):**  com.vada.newfarmoon

#### Android Developer

April 2018 – November 2018 (7 months)

Farazman - Small startup working on innovative ideas

Tehran, Iran

- Developed Android applications for 3 client projects across multiple business domains.

#### Freelance Android Engineer

January 2017 – 2020

Various Clients

- Delivered multiple Android applications across e-commerce, social media, and fitness domains

### Languages
