

ALIREZA GOSHAYESH

SENIOR ANDROID ENGINEER

✉ goshayesh.alireza@gmail.com | 💻 alireza-goshayesh | 🌐 DeveloperIs.me | 📞 alirezagoshayesh | 📞 +98 922 4968533

Senior Android Engineer with **10+ years of experience** building large-scale mobile applications across fintech, banking, and consumer products. Specialized in **Kotlin, Jetpack Compose, Kotlin Multiplatform (KMP), Clean Architecture, and modular Android systems**. Experienced in leading modernization initiatives, cross-platform mobile architectures, SDK development, code reviews, and mentoring engineers. Contributed to mobile products serving millions of users, including a mobile banking platform with over 10M users.

Technical Skills

Languages: Kotlin, Java

Android: Android SDK, Jetpack Compose, Coroutines, Flow, Navigation, WorkManager, Room, DataStore, Retrofit, Firebase

Architecture: Clean Architecture, MVVM, MVI, Modularization & Multi-Module Architecture

Cross Platform: Kotlin Multiplatform (KMP)

Security: AES, RSA, OAuth2, Digital Signatures, Encryption

Testing: JUnit, MockK, Unit Testing, Compose UI Testing

Tools: Git, Gradle, Hilt, CI/CD

Experience

Senior Android Engineer

MIDDLE EAST BANK - Large-scale mobile banking platform

March 2023 – Present

Tehran, Iran

- Developed and maintained features for a large-scale mobile banking platform serving 10M+ users.
- Led a complete UI refactoring initiative, migrating 100+ screens from Android Views to Jetpack Compose.
- Migrated a legacy Java banking app to Clean Modular KMP with shared business logic across Android and iOS.
- Participated in architectural design, code reviews, and engineering standards across the mobile team.
- Performed code reviews and mentored engineers to improve code quality and maintainability across the mobile codebase.
- Implemented unit testing using MockK and contributed to maintaining approximately 50–60% business-layer test coverage.

Android Engineer

VADA - Mobile App Experts

June 2021 – May 2023 (1 year, 11 months)

Tehran, Iran

- Developed and maintained payment and user-management SDKs used across 50+ internal mobile applications.
- Led technical discussions, code reviews, and development processes across multiple Android projects.
- Mentored interns and junior engineers, supporting onboarding and technical growth.

Android Developer

VADA - Product Development Division

January 2019 – June 2021 (2 years, 6 months)

Tehran, Iran

- Delivered and maintained 5 Android applications with download counts ranging from 50K to 1M+ users.
- Participated in architecture decisions across mobile and backend systems.

➤ Notable Projects:

- **Picture Dictionary (AI-powered dictionary application):**
🔗 com.appinaweek.cameradictgp
- **Farmoon (Vehicle and Toll services platform):**
🔗 com.vada.newfarmoon

Android Developer

Farazman - Small startup working on innovative ideas

April 2018 – November 2018 (7 months)

Tehran, Iran

- Developed Android applications for 3 client projects across multiple business domains.

Freelance Android Engineer

Various Clients

January 2017 – 2020

- Delivered multiple Android applications across e-commerce, social media, and fitness domains

Languages

English: Professional Working Proficiency (B2-C1)

Persian: Native

Education

Sadra University

B.Sc. in Computer Engineering

Tehran, Iran

September 2016 – June 2020
